

SAE Sealing Caps GPN 241

www.poeppele.com/en/gpn241

Application

The GPN 241 SAE sealing caps are suitable for protecting the mating surfaces of SAE quick-connect plugs. The wider diameter of the collar prevents accidental assembly with a quick connector. Depending on the surface quality of the SAE connector, short-term pressurisation of approx. 1 bar is possible.

All information about 100% PCR and the recycling blend can be found in "Sustainability at Pöppelmann" (see chapter 2) or at www.poeppele.com/en/kapsto/Responsibility.html

Dimensions in mm.

*This size is supplied with inner ribs.

Information on materials, colours, designs and use of our products can be found on the website and in chapter 3 'Materials and application'.

The articles in the 100% PCR column consist of 98% PCR-PE and 2% colour based on a PIR carrier. The plastic used consists of 100% PCR.

The articles in the recycled mixture column consist of a blend of PCR and virgin material. Colour deviations and black dots cannot be completely avoided during production and are permissible for these items. We recommend carrying out functional tests before series production.

Your added values:

More resource-saving.

This standard series is available from PCR, saves CO₂e emissions and conserves resources.

Better fit.

For protecting the mating surfaces of SAE quick-connect plugs.

Seals better.

Depending on the surface quality of the SAE plug, a short-term pressurisation of approx. 1 bar is possible.

Cleaner.

Production in accordance with VDA Band 19 and ISO 16232 in our cleanroom on request.

Better.

Diameter A prevents the inadvertent assembly with a quick connector.
