

VDA Sealing Plugs GPN 247

www.poeppelmann.com/en/gpn247

NEW

Application

The VDA sealing plugs GPN 247 are suitable for protecting the connection area of VDA quick-release couplings. The clamping at the upper edge offers special protection. Sealing is carried out gently and securely on the internal sealing rings of the connector. The plastic used is made from post-consumer recycled material.

All information about 100% PCR can be found in "Sustainability at Pöppelmann" (see chapter 2) or at www.poeppelmann.com/en/kapsto/Responsibility.html

Information on materials, colours, designs and use of our products can be found on the website and in chapter 3 'Materials and application'.

The article consists of 98 % PCR-PE and 2 % colour based on a PIR carrier. The plastic used consists of 100 % PCR.

For these articles, colour deviations and black dots cannot be completely avoided in production and are permissible. We recommend carrying out functional tests before series production.

Your added values:

More resource-saving.

The plastic used consists of 100 % recycled material.

Better fit.

For protecting the mating surfaces of VDA quick connectors.

Cleaner.

Production in accordance with VDA Band 19 and ISO 16232 in our cleanroom on request.

Better.

Clamping is carried out gently and safely on the internal sealing rings of the connector.
