

Closure Plugs GPN 300 F

www.poeppelmann.com/en/gpn300fs

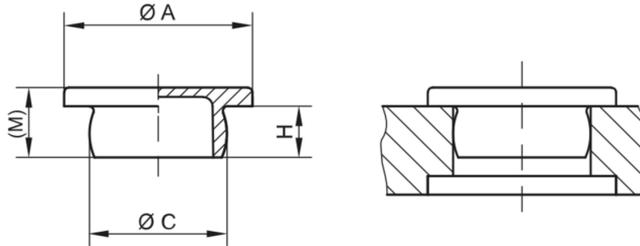

Application

The GPN 300 F closure plugs can be used to protect internal threads and bore holes, and ensure a firm fit thanks to their crowned shank. The flat head enables space-saving use.

All information about 100% PCR and the recycling blend can be found in Sustainability (see chapter 2) at Pöppelmann or at www.poeppelmann.com/en/kapsto/Responsibility.html

Dimensions in mm.

The articles from GPN 300 F 52 are made of PE-LLD.

Information on materials, colours, designs and use of our products can be found on the website and in chapter 3 'Materials and application'.

The articles in the 100% PCR column consist of 98% PCR-PE and 2% colour based on a PIR carrier. The plastic used consists of 100% PCR.

The articles in the recycled mixture column consist of a blend of PCR and virgin material. Colour deviations and black dots cannot be completely avoided during production and are permissible for these items. We recommend carrying out functional tests before series production.

This application table represents guideline values. We would be pleased to send you free samples.

Your added values:

More resource-saving.

This standard series is available from PCR, saves CO₂e emissions and conserves resources.

More versatile.

Multi functional use for internal threads and bore holes.

Cleaner.

Production in accordance with VDA Band 19 and ISO 16232 in our cleanroom on request.

Greater variety.

The GPN 300 is available ex stock in black and also in natural.

Better.

Flat-headed design. Firm fit due to crowned shank.
